

Feedback for group ...

General

Is the general flow of the scenario/storyboard clear? Do you think something important is missing?

Persona

What do you think of the chosen persona? Did the group leave out important aspects which may result in unforeseen difficulties (for example, no/ incomplete details given about hobbies, interests, spare time)?

Do you think the chosen persona can resemble a more general group of people? Or do you think that this persona is quite unique?

Do you think the given scenario will work out for the persona?

Core functions and claims (analysis)

Do you agree with the claims stated on the various parts of the scenario?

Do you think some of the claims and/or core functions are impossible to be implemented for this project (given the amount of time and resources)?

Other
