English translation and editing: Adele Sanders, Delft EdiTS

Contents

Water treatment schemes	11
Coagulation and flocculation	37
Sedimentation	51
Flotation	67
Filtration	81
Adsorption	103
Disinfection	115
Aeration and gas stripping	133
Softening	153
Micro- and ultrafiltration	173
Nanofiltration and reverse osmosis	189
Laboratory experiments	203

Detailed contents

Water treatment schemes	11
Framework, contents, study goals	12
1. Introduction	13
2. Groundwater	14
3. Riverbank groundwater	20
4. Surface water with direct treatment	22
5. Surface water with infiltration	30
Coagulation and flocculation	37
Framework, contents, study goals	38
1. Introduction	39
2. Coagulation	40
3. Flocculation	45
Sedimentation	51
Framework, contents, study goals	52
1. Introduction	53
2. Theory	53
3. Influences on settling in a horizontal flow tank	58
4. Practice	62
5. Settling tank alternatives	64
Flotation	67
Framework, contents, study goals	68
1. Introduction	69
2. Principle	69
3. Theory	71
4. Practice	76
Filtration	81
Framework, contents, study goals	82
1. Introduction	83
2. Principles	83
3. Theory	87
4. Practice	91
5. Alternative applications of filtration	95

Adsorption	103
Framework, contents, study goals	104
1. Introduction	105
2. Theory	107
3. Practice	110
Disinfection	115
Framework, contents, study goals	116
1. Introduction	117
2. Purpose of disinfection	117
3. Disinfection kinetics	125
4. Disinfection methods	129
Further reading	133
Aeration and gas stripping	135
Framework, contents, study goals	136
1. Introduction	137
2. Theory of gas transfer	138
3. Practice	144
Softening	153
Framework, contents, study goals	154
1. Introduction	155
2. Principle	155
2. Theory	159
3. Practice	164
Micro- and ultrafiltration	173
Framework, contents, study goals	174
1. Introduction	175
2. Principle	177
3. Theory	179
4. Practice	184
5. Operation	187

Nanofiltration and reverse osmosis	189
Framework, contents, study goals	190
1. Introduction	191
2. Principle	191
3. Theory	193
4. Practice	198
